

To Whom it may concern, As one who travels extensively through this great Country of ours, having the services of satellite radio...ESPECIALLY the traffic and weather reports, AHEAD of time for the Cities I will be going to...is INVALUABLE. I drive high profile rock and roll bands and artists to their venues, knowing what weather and traffic to expect is VITAL to getting them safely and on time to their destinations... Local FM and AM stations don't broadcast far out and are a hinderance when we don't know conditions ahead of time. I IMPLORE you to continue to let them broadcast this vital information to us as we drive, to make the roads safer and get our clients to their destinations on time and safely.

Thank you.

Sincerely,

Jeremy Russell
